EXPERIENCE

POSSUMS

Fullstack Developer · Aug 2023 — Present

- Front-end development on the company platform, building accessible interfaces for two audiences: parents and clinicians.
- Ship full-stack features end to end: NestJS endpoints, Prisma schema changes, GraphQL and data migrations against live records.
- Built the professional side of possums.org that absorbed the NDC Institute site in October 2026: sign-up and checkout flows, the NDC Register, and accreditation certificates and licences rendered as locked PDFs with the payment reconciliation behind them.
- Fixed sign-ins that failed on capitalisation, across the lookup, the write path and the existing rows.
- Unified the parent and professional signup flows behind one generic checkout hook, removing roughly 350 lines of divergent code from a payment path and recovering the case where an existing email would otherwise have to start over.
- Corrected subscription access so a cancelled plan stays valid until the paid period ends, and centralised the entitlement check so two services could not disagree about who has access.

DELÂNCIA

Freelance Developer · Dec 2024 — Present

- Designed and built a custom Shopify storefront on the GraphQL Storefront API, with real-time product data.
- Ran the project solo: scoping, build, launch and client communication.

MARC BONAVENTURE

Freelance Developer · Sep 2026

- Built an author's site and its Portuguese-language CMS solo, so a non-technical client posts his own readings, photographs and video without a developer.
- Modelled events and media in Prisma and PostgreSQL, with server actions in place of a separate API, and put uploads behind a storage interface that moved from local disk to Cloudinary and R2 untouched.

SELECTED WORK

POSSUMS possums.org	Next.js · NestJS · GraphQL · Prisma
NDC INSTITUTE possums.org/ndc-institute	Next.js · NestJS · GraphQL · SQL
DELÂNCIA delancia.com	Next.js · Shopify · GraphQL · Motion
MARC BONAVENTURE www.marcbonaventure.com	Next.js · Prisma · PostgreSQL · Mantine

EDUCATION

FULLSTACK WEB DEVELOPMENT BOOTCAMP Ironhack, Lisbon	Jan 2023 – Mar 2023
IOS DEVELOPMENT Udacity	2018
SWIFT, THEN WEB DEVELOPMENT Self-taught	From 2017

SKILLS

LANGUAGES	JavaScript, TypeScript, SQL, HTML, CSS, Sass
FRAMEWORKS	React, Next.js, NestJS, Prisma, GraphQL
TOOLS	Git, PostgreSQL, Docker, Meilisearch
LANGUAGES	Portuguese, English
INTERESTS	Hiking, sci-fi, photography, coding
